ISA Transactions 33 (1994) 433–435

ISA
TRANSACTIONS®

Cumulative contents of Volume 33

Volume 33, Number 1, May 1994

1 **Editorial viewpoint**
3 **Dynamic modeling for process control and operability**
E.J. Longwell
11 **Applications of dynamic simulation to industrial control problems**
J.D. Cole and K.B. Yount
19 **Dual composition control of a debutanizer column**
M.S. Freitas, M.C.M.M. Campos and E.L. Lima
27 **Using temperature profile for product quality estimation on a distillation column**
T. Mejdell and B.-O. Andersson
35 **Flexible gain scheduler**
G.K. McMillan, W.K. Wojsznis and G.T. Borders
43 **Simplified IMC-PID tuning rules**
P.S. Fruehauf, I-L. Chien and M.D. Lauritsen
61 **Application and installation guidelines for volumetric and mass flowmeters**
D. Ginesi and C. Annarummo
73 **The effects of 'winterizing' pH buffers**
I. Verhappen
83 **Programmable electronic systems applied for risk control in petrochemical plants**
C.W. Thurston
99 **Limit switches: Selection for safety**
J.-J. Paques

Volume 33, Number 2, July 1994

105 **Editorial viewpoint**
107 **Quantifying the benefits of automation**
J. deSpautz
113 **The benefits of a manufacturing execution system for plantwide automation**
A.C. Deuel
125 **Use of structured design and development in the validation of application software**
M.K. Gruber

133 **Building multivariable predictive control models by process simulation and data regression**
Y. Yiu, Y. Fan, L.W. Colwell and M.N. Papadopoulos
141 **Model-based control using mechanistic, nonlinear models**
J.B. Riggs, M.H. Beauford and J.C. Watts
147 **A comparison of two design methods for PID controllers**
C.C. Hang, W.K. Ho and L.S. Cao
153 **Considerations for advanced centrifugal compressor control**
R. Rammler
159 **On-line condition monitoring of rotating equipment using neural networks**
J.P. Peck and J. Burrows
165 **Variable-speed drives as flow control elements**
I.H. Gibson
171 **Automatic industrial cross-correlator for flow measurement**
J. Chen, J. Tornberg, J. Kivimaa and M. Karras
181 **Measurement of pipe flow by an electromagnetic probe**
X.-Z. Zhang and J. Hemp
185 **Effects of maintenance policies on MTTF of dangerous failures in programmable electronic controllers**
J.V. Bukowski and W.M. Goble

Volume 33, Number 3, September 1994

195 **Editorial viewpoint**
197 **Challenges of tomorrow for the control systems professional**
P. Boyette and R.S. Bhullar
207 **Strategy and implementation of an information infrastructure to support contemporary management practices**
R.C. Hill
217 **Evaluation of refinery control systems**
K.K. Gidwani and R.F. Beckman
227 **Windows usage in a plant automation system**
C. Ottino
235 **Model predictive control: Past, present and future**
J.B. Froisy
245 **Headbox modeling for cross-direction basis weight control**
A. Kjaer, M. Waller and P. Wellstead
255 **Personal computer process loop simulator**
R. Klopfenstein, Jr.
275 **Control valve noise**
K.W. Ng
287 **Temperature measurement on the job site using RTDs and thermocouples**
R.J. Rosenberg
293 **Software linearization techniques for thermocouples, thermistors, and RTDs**
L.R. Klopfenstein, Jr.

307 Viscosity measurement
R. Jethra
313 Predicting and understanding thermal performance in today's instrument loops
H.A. Alawadi, B.C. Johnson and D. Schlameus

Volume 33, Number 4, December 1994

327 Editorial viewpoint
329 Multi-parameter process prediction with neural networks
N. Manukian, J. Neuhaus and G. Wilensky
339 Comparison of ANSI / ASME and ISO models for calculation of uncertainty
W.G. Steele, R.A. Ferguson, R.P. Taylor and H.W. Coleman
353 Application of response surface methodology in controller fine-tuning
E. Nakano and A. Jutan
367 An object oriented approach to batch programming
S.L. Sharpless, R.J. Winslow and M.W. Sakmar
377 Average molecular weight determination of a polyester by NIR spectroscopy
S.J. Robbins, W.D. Mockel and C.J. Lyons

Special section on advanced mathematical tools in metrology
Guest Editor: F. Pavese

381 Foreword
F. Pavese
383 A classification of mathematical software for metrology
M.G. Cox
391 Calibrations by comparison in metrology: A survey
W. Bich and P. Tavella
401 Performance of standards: intercomparison, treatment of correlations, detection of laboratory offsets and outliers, and long-term assessment of an ensemble of standards
R.B. Frenkel
411 Outlier-resistant methods for estimation and model fitting
D.F. Vecchia and J.D. Splett
421 Software quality assurance in metrology
D. Richter
429 Author index of Volume 33
433 Cumulative contents of Volume 33
